

LIVE FIRE TRAINING

www.sterela.fr

sterela 
DEFENSE & SECURITY

STERELA

has been designing and manufacturing systems for live fire ground-to-ground and ground-to-air training sessions since 1989, date of its first contract with the French army.

Sterela's offer aims institutions, Ministries of Defence (MoD), Interior (MoI), Justice and Finance in addition to the private sector .

TARGET SYSTEMS

live fire	targets	infantry
resistant	scenarios	special forces
commando	simulators	police

LIVE FIRE TRAINING

Aware of the new unit engagement doctrines, STERELA offers solutions to cover all training cycles and programmes depending on the environment. These include:

Indoor shooting range | Outdoor shooting range & Practical shooting

Urban shooting | Outdoor shooting range

To secure and ensure follow-up for its customers, STERELA offers life-cycle support for all its equipment and guarantees a production lifetime of at least 15 years.

INDOOR SHOOTING STAND TRAINING

STERELA solutions for indoor shooting ranges are designed for police forces, customs or prison administrations in addition to private companies authorised to carry firearms.

▶ 273.96

MISSION

To learn and perfect shooting skills using stationary or moving targets in an operational mission context.

APPROACH

Training in shooting over short distances develops and tests rapidity of analysis, accuracy and reflexes while giving practice in using handguns and small arms.

▶ 476.93

The equipment is portable, enabling the targets to be used for other types of training sessions. It can be controlled by remote control system or through a command unit in a control room.

PCI100
▶ pop-up or scissor target-holder

890.47

PCI100
▶ friend/foe target-holder

MOV100
▶ mobility kit for the PCI100

MSR100
▶ radio-control system for PCI100 and MOV100

PCxLOG
▶ stationary scenario-generation system

- ▶ National Police Academy, Saint-Malo, France
- ▶ Departmental directorate of public security, Northern Corsica
- ▶ French Ministry of the Interior
- ▶ Gendarmerie School, Châteaulin, France
- ▶ Gendarmerie Officers' School, Melun, France

OUTDOOR SHOOTING RANGE & PRACTICAL SHOOTING TRAINING

STERELA solutions for practical outdoor shooting range training are designed for infantry regiments, special forces, commando or anti-terrorist units and anti-crime brigades.

MISSION

To learn and perfect shooting skills with stationary and moving targets outdoors so as to control your unit's engagement by understanding the different terrains, environments and climatic conditions.

APPROACH

Shooting training while moving enables team members to develop their skills in terrain analysis, reactions, accuracy and group communication and coordination.

Supported by simulators with background noise, pyrotechnic and blast effects simulating hostile engagement, STERELA outdoor shooting range solutions help prepare and develop your unit's operational reflexes.

All our equipment is autonomous and easily carried so it may be used for other types of outdoor training session. It can be controlled using a remote control system so the targets appear either on command or according to predefined scenarios.

- ▶ Infantry regiments in France
- ▶ Kingdom of Saudi Arabia
- ▶ Portugal : EXERCITO PORTUGUES - Escola das Armas. (Army Infantry School)
- ▶ Montenegro

URBAN SHOOTING TRAINING

STERELA solutions for urban shooting and shooting house training sessions are designed for special forces, commando or anti-terrorist units and anti-crime brigades in urban environments.

MISSION

To learn and perfect target shooting skills in awareness of the environment, unit movements and coalition between team members in urban warfare contexts.

APPROACH

Urban combat training develops stress control, discernment, speed, positioning and coordination of special force members.

Combined with a range of sensors, targets may appear automatically when somebody is detected, making the training session dynamic, interactive and realistic.

Adding simulators (sound and visual battle effects), operational units and teams become hardened to urban combat context.

Targets are autonomous, easy to deploy, they may be moved over short distances. They can be controlled near the operators using a remote control system or by a command unit in a control room.

- ▶ CENZUB : Urban combat training facilities for the French Army
- ▶ Egypt : Special Police Forces
- ▶ Senegal : Tactical training centre CET no. 7, Thies

OUTDOOR SHOOTING RANGE TRAINING

STERELA solutions for outdoor shooting ranges are designed for different components of the regular army forces (Land Force, Sea Force, and Air Force), in addition to snipers.

MISSION

To learn and perfect shooting skills (for all calibers) using stationary and moving targets in attack or entrenched situations.

APPROACH

STERELA solutions allow you to construct an outdoor shooting range replicating field conditions for carrying out tactical military operations combining the use of different types of weapon at the same time (suppressive, barrage or supporting fire).

Supported by simulators with background noise, pyrotechnic and blast effects simulating hostile engagement, STERELA outdoor shooting range solutions help prepare and develop your engaged unit or regiment's operational reflexes.

A UNIQUE KNOW-HOW FOR EXCEPTIONAL TRAINING

PCI100

- ▶ friend/foe
- ▶ pop-up or scissor
- ▶ windows or door openings
- ▶ long-range

PCA400

- ▶ anti-tank

PCI600

STATIONARY TARGETS

- ▶ pop-up or scissor
- ▶ rising
- ▶ lateral movement

MOV100

- ▶ mobility kit for the PCI100

CMA400

- ▶ mobility kit for the PCA400

CM1300NG

MOVING TARGETS

- ▶ 1 to 3 independent moving targets on a rail

MSR100

- ▶ radio-control for PCI100, MOV100 and PCI600

SRC

- ▶ radio-control for implementation of scenarios

PCXLOG

CONTROL SYSTEMS

- ▶ stationary scenario-generation system

OPTIONS

- ▶ smoke battle effect

Accessories

- ▶ sound and lighting battle effects

Sensors

- ▶ trigger system for doors, laser and infrared intrusion detection
