The FALCON connectors offer the best attentuation values and smallest 12-channel connector foot-print on the market. With an insertion loss of <1,2 dB, it outperforms the NATO specification (<2,5 dB). In addition, the FALCON is the only expanded beam connector on the market that has proven to transfer 40Gbit/s over one channel.

Micropol supplies cable systems with rugged, high-quality cables that can cope with both extreme temperatures ranging from -57°C to +100°C and high physical impact. Our fiber optic cables are tested to last +15.000.000 bends at 30 mm radius and can hang free for 2 km with proportions intact. Lengths range from a few decimeters up to several kilometers. Bulkhead connectors can be provided with conductive surface to discard EMI.
