

RUGGED ETHERNET SOLUTIONS FOR THE NORDIC MARKET

"The partnership with OnTime Networks marks an important milestone in our Nordic initiative within the defense and civil preparedness domain."

- Leif Haugland, CEO Obsima Technology

"This agreement marks the beginning of an important strategic collaboration that will strengthen the position of both parties within this market."

- Øyvind Holmeide, CEO OnTime Networks

TAILOR-MADE SOLUTIONS FOR DEMANDING ENVIRONMENTS

– WITH A SOLID FOOTHOLD
IN THE NORDIC REGION

OnTime Networks is an innovative provider of rugged Ethernet and precision timing solutions for real-time, mission-critical applications in the aircraft, defense, and space markets.

The company is recognized as a pioneer in rugged networking technologies designed to perform reliably in the most demanding environments.

OnTime Networks develops and manufactures rugged Ethernet TSN switches, routers, network taps, GPS time servers, and embedded mission-critical products.

These solutions are purpose-built for applications requiring high performance, deterministic communication, and accurate time synchronization, including flight test, ground defense, naval systems, and next-generation combat vehicles.

CHOOSING ONTIME NETWORKS AND OBSIMA TECHNOLOGY AS YOUR MANUFACTURER AND SUPPLIER OFFERS SEVERAL KEY BENEFITS:

- Developed and manufactured in Norway.
- Provides an inherently secure source of supply by ensuring all products are manufactured locally under strict quality controls.

- Control of the entire production chain, allowing for comprehensive oversight and consistent quality at every stage.
- Already certified for high security data transmission for ground, air, and naval combat programs in several NATO countries.
